PC Auto Shutdown is a handy software that helps you automatically shutdown, power off, reboot, hibernate, suspend or log off computers at schedule time you specifies. It can shut down computers at schedule time when no user is logged in or when computers are in suspended power conservation mode. It gives you different ways to schedule the shutdown event for your needs, such as daily, weekly and only once. During the shutdown, it can clean up Recycle Bin, temporary files, IE cache, IE cookies, IE history, IE auto- complete entries and recent document list to improve system performance and protect your privacy.

Key features:

- * Shut down, power off, reboot, hibernate, suspend or log off computers at schedule time.
- * Shut down, power off, reboot, hibernate, suspend or log off computers at schedule time when no user is logged in
- * Activate computers from suspended power conservation mode, and shut down, power off, reboot, hibernate, suspend or log off computers at schedule time
 - * Different schedules to meet your needs.
- * You can set up hotkeys to shut down your computer instantly.
- * Clean up IE cookies, history ,temporary files and Recycle Bin to protect your privacy.
- * Set password to avoid others changing your schedule configuration.

- * Customize alarm sound and countdown duration during shutdown.
- * Log each shutdown events

بدرهه مهكاني نهم كومپانيايه برتتیه له
